SKILLS

- Languages: C#, PHP, JavaScript
- Frameworks: ASP.NET Core, Entity Framework
- Databases: SQL (PostgreSQL, MySQL)
- Tools/Libraries: jQuery, Node.js, NGINX, Bootstrap, Git, Visual Studio, Heroku

PROFESSIONAL EXPERIENCE

Coder Foundry

Jun 2022-Sep 2022

Full Stack .NET Developer

- Created [Remedy](#), a fully functional multitenant issue/ticket tracking system using ASP.NET Core MVC and PostgreSQL. Enables companies to track projects and the lifecycle of the trouble tickets within. Implemented user and role based security to establish separation of duties.
- Created a blog platform hosted on [Code & Caffeine](#), a blog site using ASP.NET Core MVC and PostgreSQL. Implemented a role based security system, file upload, search, and email service. Designed to be easily packaged and shipped to others for hosting and use. Database interaction done through LINQ to Entity Framework. Established an API to push blog posts to portfolio.
- Created [ContactPro](#), a fully functional contact management site using ASP.NET Core MVC and PostgreSQL. Enables users to store contacts, filter by category, search and email contacts directly or by category. Database interaction done through LINQ to Entity framework.
- Created [Portfolio](#), a static site to showcase my abilities as a developer using HTML, Javascript, CSS and Bootstrap. Called on the Code & Caffeine API to populate blog posts.

Software Technology Forum

Jan 2022 - Jun 2022

Engineering Technician

Portsmouth, VA

- Conducted initial configuration and testing as well as system, windows, linux, antivirus and firewall updates on local Battle Force Tactical Network (BFTN) systems.
- Provided on-site or remote BFTN instruction to Navy sailors on the maintenance, testing, evaluation, and upkeep of their shipboard BFTN system.
